SMART AND HIGH RESPONSIVE SOFTWARE TO MANAGE SAFETY ON ALL DEVICES

NAMIRIAL HSE: INNOVATION FOR HEALTH & SAFETY

HSE is the new Namirial platform that allows web security management for small, medium and large companies. It's an innovative management software that is highly scalable according to business needs, which allows in total web mode, both Saas and On premise, the management of health and safety in the workplace, in compliance with the rules and legal obligations.

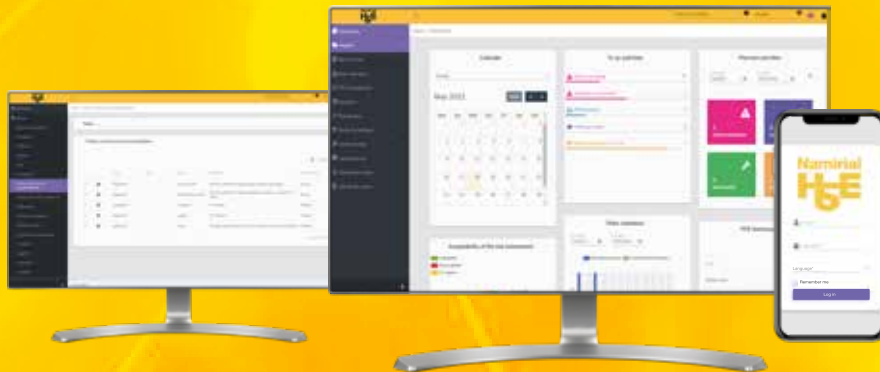

MAIN FEATURES

Multi-company with access management
Smart & high responsive to manage safety on all devices
Indicators and process KPI analysis

Thanks to its modular structure, Namirial HSE meets the needs of both small and medium-sized enterprises and large entrepreneurial realities, including public ones, which are much more structured with offices located throughout the territory.

MAIN FEATURES

Risk assessment and planning activities
Human resources, tasks management, deadlines and notifications
Safety activities & training planning management

HSE is a simple, complete and versatile platform, which allows to have under control and manage all company security in a practical and effective way.

MAIN FEATURES

Personal Protective Equipment (PPE) management
Plants, machines and equipment maintenance
Document management and signature
